

**ASSURANT**  
Health®

## Applicant Checklist

Assurant Health relies on your complete and accurate answers to the health history questions. The thoroughness, completeness and accuracy of the responses to the application questions will have a significant impact on your eligibility for insurance. Information that is not completely and accurately disclosed may result in the rescission of coverage.

- Truthful, complete and accurate responses to the health history questions on the application were provided.
- You have fully disclosed on your application any and all health history information as it pertains to the health history questions and within the timeframes as specified by each question.
- If you are in doubt about a medical condition, tell us about it. The Assurant Health Underwriters will review the information during the underwriting process. We may call you for additional details.
- You should call Assurant Health Underwriting at any time if you think of anything else that should or should have been disclosed.
- Providing accurate child height and weight information is very important. If the information is not provided, or if it is inaccurate, an incorrect underwriting risk decision could be made.
- We require several authorizations during the application process. It is critical that you complete each authorization to ensure that we can promptly begin the underwriting process.
- While Assurant Health obtains a medical authorization, medical records are not automatically ordered so full and complete medical information must be disclosed at the time of underwriting. Do not assume that medical records will be ordered.
- Check to ensure that billing and payment information provided by you is complete and accurate.
